From the Philippines to the rest of the world

Invest in the heart of Southeast Asia.

GSMH LAW

Invest in the rising economy

In march 2023, S&P Global Market Inteligence identified the Philippines as amongst the world's fastest growing emerging markets.

Benefit from Philippines' booming BPO and tech sectors, as well as government investments in infrastructure and innovation.

Strategic Southeast Asian Hub

The economic growth momentum is sustained by remittances from Overseas Filipino Workers, Business Process Outsourcing and the recovery of tourism. There is also the abundance of skilled labor, the relatively lower cost of living and, of course, the warmth and hospitality of the Filipino people.

Significant institutional reforms

The Philippines has made significant institutional reforms to make it more ideal for foreign direct investments. Recent legislation in 2023 now allows full foreign ownership in select industries such as airports, railways, expressways, and telecommunications. The required per store investment for foreign-owned retail trade businesses have also been reduced to US$200,000 and other restrictions have been eased. Corporate income taxes have been reduced from 30% to 25% fpr large firms and 20% for small firms. Notwithstanding the reduction, income tax holidays and other business incentives still remain for industries covered by the Strategic Investments Priorities Plan.

About GSMH Law
